PROFESSIONAL SUMMARY

Computer Science student and Full-Stack Developer with hands-on experience in web development, backend team leadership, and optimization research. Proficient in Laravel, React, PHP, Java, and database design.

TECHNICAL SKILLS

Languages: Java, Python, PHP, JavaScript, HTML5, CSS3, SQL
Frameworks: Laravel, React, Node.js, Flask, Tailwind CSS, Bootstrap
Databases/Tools: MySQL, Git, GitHub, VS Code

PROFESSIONAL EXPERIENCE

Full-Stack Web Development Intern Aug 2025 – Sept 2025
RADMedics Corporation *Mandaluyong City, Philippines*

- Refactored legacy Laravel modules into reusable components using PHP and Tailwind CSS while maintaining existing backend functionality.
- Fixed cross-browser UI issues and improved page performance across desktop and mobile devices.
- Collaborated with the development team through daily standups, code reviews, and Git-based deployment workflows.

Backend Web Development Team Lead Sept 2024 – July 2025
PUP Manila Microsoft Student Community *Sta. Mesa, Manila, Philippines*

- Led a team of 20 members by assigning tasks, monitoring progress, and organizing three backend development workshops.
- Reviewed student projects and provided feedback on code quality, debugging practices, and backend implementation.
- Developed training materials on database design, REST APIs, and backend development fundamentals.

TECHNICAL & ACADEMIC PROJECTS

Extended Firefly Algorithm (EFA) for Flood Scenario Deployment Dec 2025
Research Project Lead *Academic Research*

- Developed a Java-based simulator implementing the Extended Firefly Algorithm to optimize resource deployment across 30 flood-response scenarios.
- Improved optimization performance by 4.08% through hyperparameter tuning and algorithm refinement.
- Reduced memory usage by 48.88% compared to the baseline through algorithm and data structure optimizations.

PUP Commeownity — Full-Stack Asset Management Platform June 2025
Full-Stack Developer *Web Application*

- Developed a campus resource management platform using Laravel, MySQL, and Tailwind CSS for event registration, profile management, and health record tracking.
- Designed relational database schemas, implemented CRUD operations, and built responsive interfaces for administrators and students.

EDUCATIONAL BACKGROUND

Polytechnic University of the Philippines Oct 2022 — Sept 2026 (Expected)
Bachelor of Science in Computer Science *Sta. Mesa, Manila, Philippines*

- Achieved President's Lister honors across all semesters, maintaining a GWA of 1.00–1.50.

PROFESSIONAL CERTIFICATIONS

- CS50's Introduction to Computer Science (August 2024)** – Harvard University (EdX Verified)
- Networking Essentials (June 2024)** – Cisco Networking Academy
